INVITATION

Dear Friends and Colleagues

We are pleased to invite you to the **44th South African Chemical Institute National Convention**, which will be held *in person* in **Stellenbosch, 8 –13 January 2023**.

The aim of the National Convention is to bring together scientists from a variety of disciplines, covering all aspects of Chemistry through plenary addresses, invited, keynote and contributed presentations and posters on the theme of *Chemistry for sustainable development in Africa*.

We, the organisers, would be honoured if you would accept our invitation to be an integral part of SACI-44. As chemists we know that we can deliver solutions that will further the sustainable development of not only South Africa, but our beloved African continent. From clean water to combatting diseases, from novel materials to new technologies, from our natural resources to our cutting-edge science, come and contribute, network and be inspired by our beautiful science and let us keep moving forward with our sustainable development goals.

We hope that you will make use of this opportunity to join us in promoting cutting-edge research on Chemistry in the African region. Please find further information on our website <https://saci.co.za/SACI2023/index.html>

We look forward to welcoming you to Stellenbosch for the SACI-44 in January 2023!

Best wishes,

Catharine Esterhuysen (on behalf of the SACI-44 Organising Committee)
